
In order to browse the web without using Adobe Flash, it is necessary for you to download a plugin that will disable the browser plugin. Unlike most other plugins, this one does not affect your computer in any way and only slows down internet browsing for a few seconds at a time. This is because it allows you to browse without any of your personal information being collected or seen by third parties. With over 25 million downloads on Microsoft Windows and over 150 thousand downloads on Mac OSX alone, this plugin has been circulating the internet for quite some time now. It is estimated that 100 million people have downloaded this very popular browser plugin from its official website which offers comprehensive installation guides as well as links for troubleshooting problems associated with Flash ActiveX Control 6.0.0.0 for PC, which can be found at <http://www.softpedia.com/get/Others/Internet/ActiveX-Plugins-and-OCX-Controls/Adobe-Flash-ActiveX-Control.shtml> . Scroll down and find the link that says download now which will redirect you to the download page for flash activex control 6.0.0.0 . Now click on the link and it will take you to a page where there is a security warning about downloading ActiveX controls such as this one, but because this is a site that has been around for several years now without any issues, you should know that it is safe to run Flash Activex Control 6 . 0 .0.0 on your computer without any problems. Click on the download button and it will direct you to the security warning page again, but this time click on the continue to download button. It may take a few minutes for Flash Activex Control 6 .0.0.0 to download, so just sit back and wait for it to finish downloading. Once you have clicked on the continue link (which should go smoothly if you browse safe websites like this one) you will see a pop-up box asking you if you would like to install Flash ActiveX Control 6 . 0.0.0 , simply click yes in order for Adobe Flash ActiveX Control 6 . 0.0 . 0 to be installed on your computer. After you have clicked yes, the installation process will begin. When it is finished, a window will pop-up that will ask you if you would like to restart your browser or continue using it normally, you should always choose option number two, which is to restart your browser after Adobe Flash ActiveX Control 6 . 0.0.0 has been installed on your computer. When this is complete, you will be directed to the final page of the installation guide where finally you click continue and then finish to complete the installation process. Once it has finished installing, simply follow the instructions included in this step by step guide (on how to use Adobe Flash ActiveX Control 6 . 0 . 0 . 0) and you will be redirected to the final page which will have a complete tutorial on how to use Flash ActiveX Control 6 . 0.0.0. The next time you browse the internet, simply follow the steps provided at <http://www.softpedia.com/get/Others/Internet/ActiveX-Plugins-and-OCX-Controls/Adobe-Flash-ActiveX-Control.shtml> in order to disable your browser plugin, which is Adobe Flash Activex Control 6 . 0 .0 .0 in this case, by going to your addons or plugins page.
